**The Assessment Objectives**

- Assessment in English Literature is unlike that in most other subjects where assessment objectives can be assessed discretely.
- Experience of examining in this subject along with research conducted into how candidates approach answering questions show that there is never an occasion where one can assess a single assessment objective discretely.
- Some assessment objectives, such as AO1, 2 and 3 are always present.
- In this specification, the assessment objectives do have different weightings in different units.
- In some modules the AOs are more or less equal; in others there is a dominant AO.
- The specification and its units have been constructed and the questions have been framed so that the assessment objectives are targeted in the proportions set out in the specification.

**Unit 6**

- In this unit, the AOs are very nearly equal. The weightings of the AOs are:

AO1	9%
AO2ii	7%
AO3	8%
AO4	7%
AO5ii	9%

**How to use the grids and the marking scheme**

- For each question there is a specific marking grid which relates to the AOs tested by the question.
- There is a dominant AO in each question set in a separate column; examiners should first judge the answer by the criteria in the separate column.
- Having placed the answer in a band of the grid, move on to verify this mark by considering the other AOs.

**Coming to an overall decision**

- When you have awarded each answer a mark out of 20, proceed to re-consider the work as a whole.
- Double-check the total by going through each AO and comparing the overall mark with performance against the AOs.
- You may award +0, +1 or +2 according to your judgement of the worth of the work.  
e.g. AO5ii may be addressed in 1a, or AO4 in 1b, or you may wish to reward AO2ii, or AO1, or AO3 further.
