Unit 1

Final

Mark schemes are prepared by the Principal Examiner and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation meeting attended by all examiners and is the scheme which was used by them in this examination. The standardisation meeting ensures that the mark scheme covers the candidates' responses to questions and that every examiner understands and applies it in the same correct way. As preparation for the standardisation meeting each examiner analyses a number of candidates' scripts: alternative answers not already covered by the mark scheme are discussed at the meeting and legislated for. If, after this meeting, examiners encounter unusual answers which have not been discussed at the meeting they are required to refer these to the Principal Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of candidates' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available to download from the AQA Website: www.aqa.org.uk

## COPYRIGHT

AQA retains the copyright on all its publications. However, registered centres for AQA are permitted to copy material from this booklet for their own internal use, with the following important exception: AQA cannot give permission to centres to photocopy any material that is acknowledged to a third party even for internal use within the centre.

Set and published by the Assessment and Qualifications Alliance.

## The following abbreviations are used on the mark scheme:

M Method marks awarded for a correct method.
M dep $\quad$ A method mark which is dependent on a previous method mark being awarded.

A Accuracy marks awarded when following on from a correct method. It is not necessary always to see the method. This can be implied.

B Marks awarded independent of method.
Q Marks awarded for quality of written communication.
ft Follow through marks. Marks awarded for correct working following a mistake in an earlier step.

SC Special Case. Marks awarded for a common misinterpretation which has some mathematical worth.
oe $\quad$ Or equivalent.

| 3b | There is some (weak or <br> moderate) support for the <br> hypothesis | B1 | oe Do not allow strong support oe |
| 3c | Draws a line of best fit | M1 | Negative gradient, passing through <br> gate (7, 3) to (7, 6) at least <br> $x=3$ to $x=8$ |
|  | Reads off their line of best fit | A1 | SC1 no line of best fit or M0, <br> answer [3, 6] |
| 3d | At least 5 points with all in a <br> strong positive correlation | B1 |  |

| 4a | Rows or columns for old and new menu | B1 | oe <br> Tally chart for old menu (oe) |
| :---: | :---: | :---: | :---: |
|  | Row(s) or column(s) for responses | B1 | oe <br> Tally chart for old menu (oe) SC1 if headings all phrased as questions <br> SC1 Data Collection Sheet for students without reference to food/menu |
| 4b | $0.25 \times 78$ | M1 | oe Including complete build-up |
|  | 19.5 or 19 or 20 | A1 | Condone 19.5\% (but Q0 if then compared to 25\%) |
|  | Valid comparison with "13" (with M1 awarded) | Q1 | "13" = their (91-78) |
|  | Alternative method 1 |  |  |
|  | $\frac{91-78}{78}(\times 100)$ | M1 | or 0.17 or 0.167 or $0.166 \ldots$ or $\frac{1}{6}$ |
|  | 16.6 ... or 16.7 or 17 | A1 |  |
|  | Valid comparison with 25 (with M1 awarded) | Q1 | 25 may be implied by answer |
|  | Alternative method 2 |  |  |
|  | $1.25 \times 78$ | M1 | oe |
|  | 97.5 or 97 or 98 | A1 |  |
|  | Valid comparison with 91 (with M1 awarded) | Q1 | 91 may be implied by answer |
|  | Alternative method 3 |  |  |
|  | $\frac{91}{78}(\times 100)$ | M1 |  |
|  | $\begin{aligned} & 116.6 \ldots \text { or } 116.7 \text { or } 117 \\ & \text { or } 16.6 \ldots \text { or } 16.7 \text { or } 17 \\ & \hline \end{aligned}$ | A1 |  |
|  | Valid comparison (with M1 awarded) | Q1 | Either with 25 (may be implied) or with 125 as appropriate |
| 4c | Suitable question | B1 | eg (how much) do you enjoy the new healthy eating menu? |
|  | Suitable response section for their question | B1 | eg a lot, a little, not at all or Yes/No exhaustive response |

| 5 | $224 \div 4(=56)$ | M1 |  |
| :--- | :--- | :---: | :--- |
|  | their $56 \times 3$ | M1 dep | M2 $224 \times 0.75(\mathrm{oe})$ |
|  | 168 | A1 |  |

| 6 a | Sight of 24 | B1 |  |
| :---: | :---: | :---: | :---: |
|  | Shows $\frac{24}{40} \times 100=60 \%$ or true or yes | B1 | oe |
|  | Alternative method |  |  |
|  | $0.6 \times 40=24$ | B1 | oe |
|  | States there are 24 values in diagram | B1 |  |
| 6b | Median of girls $30 \leq t<40$ group | B1 | Correct answer only |
|  | Median of boys $=25$ | B1 | Correct answer only |
|  | Girls slower on average than boys | B1 ft | Must be interpreted |
|  | Both genders' ranges correct | B1 | Boys $=49$ girls $=(\max ) 40$ Accept interquartile ranges |
|  | Boys times more varied | B1 ft | oe |
|  | Alternative method |  |  |
|  | Mean of girls $=31$ | B1 | Correct answer only |
|  | Mean of boys = 26.9-27.1 | B1 |  |
|  | Girls slower on average than boys | B1 ft | Must be interpreted |
|  | Both genders' ranges correct | B1 | Boys $=49$ girls $=(\max ) 40$ Accept interquartile ranges |
|  | Boys times more varied | B1 ft |  |

| 7a | Number in sample in proportion <br> for each type | B1 | oe |
| :---: | :--- | :---: | :--- |
| 7 bb | $\frac{3420}{3420+4680} \times 90$ | M1 | oe $\frac{3420}{8100} \times 90$ |
|  | 38 | $\mathrm{A1}$ |  |

| 8a | Same as the LQ (and/or UQ) | B1 | oe |
| :---: | :--- | :---: | :--- |
| $8 b$ | Same as the LQ (and/or UQ) | B1 | oe or same as median |
| 8 c | Nothing | B1 | oe |

| 9a | 8, 20, 66, 101, 120 | M1 | Allow one error then ft |
| :---: | :---: | :---: | :---: |
|  | Plots heights correctly | A1 ft | Allow one error |
|  | Plots at upper bounds | M1 dep | dep on increasing graph $(20,8)$, ( 40 , their 20 ), ( 60 , their 66 ), (80, their 101), (100, their 120 ) |
|  | Horizontal line from 30 on joined graph | M1 dep | oe dep on increasing graph |
|  | Their value | A1 | Usual tolerance |
| 9bi | $\frac{54}{120}(\times) \frac{53}{119}$ | M1 | oe their 54 and 53 $0.45(\times) 0.445 \ldots$ |
|  | $\frac{2862}{14280}=\frac{477}{2380}$ | A1 | 0.200420168 <br> Accept 0.2 with working or $0.200-0.201$ with or without working <br> SC1 0.2025 or $\frac{81}{400}$ or $\frac{2916}{14400}$ |
| 9bii | $\frac{19}{120} \times \frac{101}{119} \text { or } \frac{101}{120} \times \frac{19}{119}$ | M1 | $\begin{array}{\|ll} \hline \text { oe } & \frac{1919}{14280} \\ \text { or } 0.158 \ldots \times 0.848 \ldots \\ \text { or } 0.841 \ldots \times 0.159 \ldots \\ \text { or } 0.134 \ldots \\ \hline \end{array}$ |
|  | $\frac{19}{120} \times \frac{101}{119}+\frac{101}{120} \times \frac{19}{119}$ | M1 dep | oe eg $2 \times$ either pair |
|  | $\frac{1919}{7140}$ | A1 | oe <br> 0.268767507 <br> Accept 0.27 with working or $0.268-0.269$ with or without working <br> SC1 0.2665 or $\frac{1919}{7200}$ or $\frac{3838}{14400}$ |

| 10 | Sight of a potential appropriate <br> bound 650, $749($ accept 750$)$, <br> $2.5 \times 10^{13}, 3.5 \times 10^{13}$ | B1 | In standard or ordinary form <br> also accept $749 . \dot{9}(\mathrm{oe})$ |
| :---: | :--- | :---: | :--- |
| Their minimum number of red <br> cells $\div$ their maximum ratio value | M1 | Their min red cells $<3 \times 10^{13}$, their <br> max ratio $>700$ |  |
| $\left[3.33 \times 10^{10}, 3.34 \times 10^{10}\right]$ | A1 |  |  |
